

Hemanth Kumar V

Full Stack .NET Developer

Email : Hemanth.kumar8357@gmail.com | Contact: +1 (915) 308-1699

[LinkedIn](#) | [Portfolio](#)

Professional Summary

- Experienced Full Stack .NET Developer with 5 years of expertise in building enterprise-grade web applications using **C#, .NET Core 6, .NET 6, ASP.NET Core, ASP.NET MVC, Web API, Angular 14, React**, and **SQL Server** in **Agile** environments.
- Strong proficiency in designing scalable solutions using **SOLID principles, Clean Architecture**, and **N-Tier architecture**, implementing **Dependency Injection** and modern design patterns.
- Hands-on experience across the Microsoft technology stack including **Entity Framework, ADO.NET, WCF, WPF, Windows Services, LINQ**, and **Lambda Expressions**.
- Developed responsive and dynamic user interfaces using **Angular, React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, jQuery**, and **AJAX**.
- Extensive knowledge of Angular features including **Services, Directives, Pipes, Reactive Forms, Interceptors, Modules**, and **SPA architecture**.
- Built and consumed **RESTful APIs** using **ASP.NET Web API** and **WCF**, and integrated **SOAP/XML Web Services** via **IIS** and **VBScript** for enterprise interoperability.
- Implemented data access solutions using **Entity Framework (Code First & Database First), ADO.NET, LINQ**, and optimized backend processing logic.
- Strong experience with **SQL Server (2016–2022)** including **SQL, T-SQL, Stored Procedures, Views, Functions, SSIS, ETL processes**, and database normalization.
- Designed and maintained **CI/CD pipelines** using **Azure DevOps** and **Jenkins**, managing source control with **Git** and Agile tracking through **Jira**.
- Conducted API validation and testing using **Postman** and **Swagger** to ensure secure and reliable service communication.
- Performed unit and front-end testing using **xUnit, NUnit, Jasmine, Karma**, and **Jest**.
- Architected and deployed cloud-native applications on **Microsoft Azure** and **AWS**, implementing **Microservices architecture** and scalable deployment strategies.
- Utilized **Visual Studio (2015–2022)** and **SQL Server Management Studio (SSMS)** for development, debugging, and database administration.
- Collaborated with cross-functional teams including **UI/UX, QA**, and **DevOps** teams within **Agile/Scrum** methodologies to deliver secure and high-performance applications.

TECHNICAL SKILLS:

Category	Tool/Technology
Frontend Technologies	Angular 14, React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap 4, jQuery, Kendo UI, Blazor
Backend Technologies	C#, ASP.NET Core 6, .NET 6, .NET Framework, ASP.NET MVC, Web API, Entity Framework, ADO.NET, SQL Server, LINQ, T-SQL, SSIS, VB.NET
API Development	RESTful Web API, SOAP, XML, XSLT, Postman, Swagger, JWT (JSON Web Token), WCF
Cloud & Deployment	Microsoft Azure (App Service, Function Apps, SQL Azure, Blob Storage, Table Storage, Azure Files), AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes
Version Control	Git, Azure DevOps, VSS
Project Management	Jira, Azure DevOps, Scrum, Agile
Testing	xUnit, NUnit, MS Test, Jasmine, Karma, Jest, Protractor
Additional Tools	Visual Studio 2022, VS Code, SSRS, SignalR, Jenkins, Crystal Reports
Methodologies	Waterfall, Agile, Scrum, CI/CD

Education:

Master of Science in **Information Systems and Technology** from the **University of North Texas**

Professional Experience:

Client: **Quadax, Cleveland, OH**
Full Stack .NET Developer

Jan 2023 to Till Date

Responsibilities:

- Developed high-performance **Single Page Applications (SPA)** using **Angular 14, TypeScript, HTML5, CSS3, Bootstrap 4**, and **jQuery**, leveraging **Angular 14** components and **TypeScript** services to deliver responsive cross-browser applications.
- Migrated legacy **VB.NET Web Forms** applications to **.NET Core 6** and **ASP.NET Core MVC**, integrating **Angular 14** frontend solutions to modernize enterprise systems and improve maintainability.
- Designed and implemented secure **RESTful APIs** using **C#, ASP.NET Core 6**, and **Web API**, applying **JWT authentication, Attribute Routing**, and **Authorization Filters** to secure endpoints built with **ASP.NET Core**.
- Built reusable UI modules using **Angular 14, RxJS**, and **TypeScript**, ensuring efficient client-server communication with secure **JWT interceptors** and optimized API consumption.

- Developed interactive web components using **Blazor**, **C#**, **Bootstrap**, and **JavaScript**, integrating **Blazor** with backend services developed in **.NET Core 6**.
- Engineered backend CRUD operations using **SQL Server 2022**, **T-SQL**, **ADO.NET**, and **Entity Framework (Database First)**, optimizing database interactions within **ASP.NET Core MVC** architecture.
- Implemented advanced data access logic using **Entity Framework**, **ADO.NET**, and **T-SQL**, improving performance and reducing database latency across **SQL Server 2022** environments.
- Developed automation and data processing scripts using **Python**, leveraging **Pandas** and **NumPy**, integrating processed data with **RESTful APIs** developed in **C#** and **ASP.NET Core 6**.
- Containerized applications using **Docker**, deployed to **Azure App Service**, and managed images in **Azure Container Registry**, orchestrating deployments using **Kubernetes** on **Azure Kubernetes Service (AKS)**.
- Configured **Kubernetes** clusters and **Azure Kubernetes Service (AKS)** for container orchestration, supporting scalable deployments of **Docker**-based microservices.
- Designed and maintained CI/CD pipelines using **Azure DevOps** and **Jenkins**, automating builds, **xUnit** test execution, and deployments to **AKS**, reducing deployment time by 40%.
- Performed API validation and testing using **Postman**, testing both **REST** and **SOAP** services built with **ASP.NET Core**, **XML**, and **XSLT** integrations.
- Automated frontend testing using **Protractor**, **Jasmine**, and **Karma**, improving Angular application stability and reducing UI defects in **Angular 14** modules.
- Integrated **Crystal Reports** for generating enterprise-level **PDF** and **Excel** reports, connecting reports directly to **SQL Server** databases.
- Utilized **Azure Blob Storage**, **Azure Table Storage**, and **Azure Files** within **Microsoft Azure**, integrating storage services into **.NET Core 6** applications.
- Applied **Dependency Injection** within **ASP.NET Core 6** and conducted unit testing using **xUnit**, ensuring modular architecture and testable **C#** services.
- Followed **WCAG accessibility guidelines** while designing UI components using **HTML5**, **CSS3**, and **Bootstrap**, ensuring compliance across **Angular 14** interfaces.
- Leveraged **Visual Studio 2022** and **VS Code** for development, debugging, and integration with **Git** and **Azure DevOps**, supporting full **SDLC** activities.

Environment & Technologies: C#, .NET Framework, Angular 14, Blazor, Python, Protractor, Web API, SQL Server, TypeScript, HTML5, CSS3, Bootstrap4, T-SQL, Jenkins, Kubernetes, Azure App Service, Postman, CI/CD pipelines, ASP.NET Core 6, MVC, jQuery, XML, .NET Framework, Docker, Entity Framework, JWT, Crystal Reports, Azure Storage, Blob Storage, Table Storage, Azure Files, SOAP, XSLT, Jasmine, Karma, Git, Azure DevOps, xUnit, VS Code. Top of Form Bottom of Form

Client: HSBC, India
Full Stack .NET Developer

June 2020 to Nov 2021

Responsibilities:

- Developed dynamic and responsive UI applications using **React**, **MVC**, **HTML5**, **CSS3**, **Bootstrap**, **JavaScript**, and **jQuery**, implementing reusable **React** components and enhancing frontend performance.
- Led modernization of legacy **VB.NET Web Forms** applications to **React** frontend with **.NET Core Web API** backend, reducing maintenance costs by 40% and development time by 50% for 25,000+ banking users.
- Built scalable backend services using **.NET Core**, **C#**, **VB.NET**, and **MVC architecture**, integrating **React** and **WPF** components to ensure seamless frontend-backend interaction.
- Designed and developed robust **RESTful APIs** using **.NET Core Web API**, integrating **SQL Server** through **ADO.NET**, **Entity Framework**, **LINQ**, and **Stored Procedures** for optimized data access.
- Integrated **Swagger** for API documentation and testing, utilizing **Swagger** alongside **Postman**-style validation techniques to ensure reliable endpoint performance.
- Implemented reporting solutions using **SSRS**, connecting reports to **SQL Server** databases and backend services developed in **.NET Core**.
- Enabled real-time communication using **SignalR** integrated with **.NET Core**, delivering interactive updates to **React** based user interfaces.
- Designed and implemented ETL processes using **SSIS**, supporting enterprise data workflows within **SQL Server**, and integrating ETL outputs into **.NET Core** applications.
- Secured APIs using **OAuth 2.0** and **JWT authentication**, enforcing authentication and authorization mechanisms within **.NET Core Web API** services.
- Conducted unit and integration testing using **NUnit** and **MS Test**, validating backend logic implemented in **C#** and **.NET Core** applications.
- Managed source control using **Git** and configured CI/CD pipelines through **Azure DevOps**, automating builds and deployments for **.NET Core** and **React** projects.
- Leveraged **Azure DevOps** for continuous integration and continuous deployment, integrating **Azure DevOps pipelines** with **.NET Core**, **C#**, and **React** repositories.
- Containerized applications using **Docker** and orchestrated deployments with **Kubernetes**, implementing microservices-based architecture using **.NET Core** and **React**.
- Integrated **Docker** containerization into microservices-based **.NET Core Web API** solutions, deploying scalable services through **Kubernetes** clusters.
- Utilized **Visual Studio** and **VS Code** for full-stack development, debugging, and optimization of **.NET Core**, **C#**, and **React** applications.
- Led **Agile** ceremonies including sprint planning, stand-ups, and retrospectives, ensuring effective collaboration and timely delivery of **.NET Core** and **React** solutions.

Environment: C#, VB.NET, Web forms, .NET Core Web API, Visual Studio, VS Code, React, MVC 4, WPF, ADO.NET, Entity Framework, SignalR, JavaScript, jQuery, HTML5, CSS3, Bootstrap, NUnit, MS Test, Jest, RESTful APIs, Swagger, SSIS, SQL Server 2017, LINQ, WCF, SOAP, SSRS, Azure, Git, Jira, VSS.
